OBJECTIVE

Aspiring **Software developer** with a passion for building efficient, scalable, and user-centric applications. Skilled in modern frameworks like **React**, **Express.js**, and **Angular**, with a strong foundation in problem-solving and backend development. Eager to contribute to dynamic projects and grow as a versatile software engineer.

WORK EXPERIENCE

- Technical Trainer**
CodeTantra, Hyderabad, India

Conducted technical training sessions for over 500+ students, focusing on core programming concepts, full-stack development, and problem-solving techniques.

Technologies: *Java, MEAN-Stack.*

Present
- FullStack Developer (Freelance)**
Wise Tech Board - (Remote)

I contributed to two real-time projects — Aadhya Tax Solution and Finapp — developing key features such as third-party authentication, data validation, and a performance-optimized admin dashboard using Laravel and Angular. I also implementing backend features like client data storage and user registration with MySQL.

Technologies used : *Angular, Laravel, HTML, CSS, Typescript, Git, VS Code.*

March – Aug 2024
- Frontend Developer Intern**
PrahanSoft, Narasaraopet, India

I built an intuitive, user-friendly interface for a laboratory management application using React, Material UI, and React Shades, focusing on features like appointment scheduling, patient data management, report generation, and employee management. I enhanced the overall user experience, creating an intuitive and efficient interface.

Technologies used : *React Js, HTML, CSS, JavaScript, Git, VS Code.*

May – July 2023

EDUCATION

- Bachelor of Technology in Computer Science & Engineering**
University College of Engineering, Narasaraopet, JNTUK | 2021 – 2025

GPA : 8.13 / 10
- Intermediate (Maths, Physics, Chemistry)**
Siva Gayatri Junior College | 2019 – 2021

Marks : 909 / 1000
- Secondary School Certificate (SSC)**
Government High School | 2019

GPA : 8.5 / 10

SKILLS

- Programming Languages :** Python (Basics), Java, JavaScript, SQL
- Web Technologies :** HTML, CSS, React (Basics), Angular, Express, Node
- Database & Tools :** MySQL, MongoDB, Git, SourceTree, VS Code, Postman
- Soft Skills :** Problem Solving, Designing, Communication, Teamwork, DSA

PROJECTS

- Projects Portfolio:** <https://ajayduddi-portfolio.netlify.app/>
- SMS GPT**

To bridge the gap between AI-powered chat systems and users without internet access, I co-developed SMSGPT, an SMS-based conversational AI system that delivers real-time, context-aware responses using **Google Gemini AI**. Built using **Python**, **Flask**, **PyAutoGUI**, and **Google Messages Web**.
- Support Board** [link](#)

To streamline ticket handling and improve organizational support workflows, I developed Support Board, a comprehensive ticket management system. The solution features a central dashboard for monitoring tickets, user-friendly forms for creating new requests, role-based access control, real-time status tracking, ticket assignments, and employee management. Built with **Angular**, **Node.js**, **Express.js** and **MongoDB** for secure data storage, **sessions**, **cookies**, and **Passport.js** for authentication.
- Medilab: A Laboratory Driven Application** [link](#)

To streamline laboratory operations and enhance patient management, I developed MediLab, a web-based laboratory management system built with **React**, **Material UI**, and **React Shades**. The system features an intuitive dashboard for appointment scheduling, patient record handling, report generation, and employee management.

VOLUNTEER EXPERIENCE

- Co-ordinator – Generative AI & UI/UX Workshop, CySEntia 2k24**

Led the planning and execution of an educational workshop focused on Generative AI and UI/UX, ensuring smooth operations and an engaging learning experience for student participants.
